

PROJECT DETAILS FOR FINAL SUBMISSION

Project Title: HEALING SOUNDSCAPE

Student's Full Name:
Natalie Dachavijit Gung

Instructor's Full Name:
Takanao Todo

Course:
Architectural Design 4

Studio Brief Title :
Earth, Wind, and Fire

Short Project Description (100 words max.)

Within this chaotic world, the only way to escape this suffering life is to reach Nirvana. The Healing soundscape is a place where you can “hear” the peace and bring the visitor to approach the safe place through space, aesthetic, and facade

Full Project Narrative/Text Description (300 words max.):

Inspired by Thai temple's Bell or Chor-Fah (ฆ้องฟ้า), sound sometimes could be a symbolic of territory and an image of the place. The idea of “Architecture as an Instrument” is reinterpreted and reproduced in a form of “Ceramic Facade” that focuses on how to support and develop the sound supporter and the relationship between space, user, and sound.

The Healing Soundscape is designed to provide a safe space for people who live in this busy world. Welcoming by a peaceful surrounding, the proposal is designed to encourage and support user to knows more about the meditation which will help them reach to the point of suffering.
