

## **PROJECT DETAILS**

**Project Title:**

Crafts And Common

**Student's Full Name:**

Varistha Thitiapiragkul

**Instructor's Full Name:**

Takumi Saito

**Course:**

Architectural Design 2

**Studio Brief Title:**

Urban Incubators

**Short Project Description (100 words max.):**

Located in the Charoen Nakhon area, Craft and Common spans 17,500 square meters on the site of an existing warehouse. The project reimagines the space by replacing three smaller warehouses with a larger structure that retains the silhouette of the originals. It aims to revitalize the site's historical and cultural significance by balancing the needs of local residents, tourists, and commuters. The project integrates green spaces, accessible waterway connections, and mixed-use residential zones to create a vibrant, inclusive space. By reintroducing river-based travel and fostering community engagement, the project envisions a future where urban living harmonizes with historical and ecological contexts.
