

THARA NAWA

Thara Nava aims to create a seamless blend between the general public and high-end residents by designing spaces that encourage both interaction and inclusivity. The project integrates multi-level common areas and a transitioning staircase, connecting public gathering spaces with private residential zones. Inspired by classic Thai riverside warehouses, the boathouse invites the community with its open design and practical features like boat parking and repair shops. Meanwhile, rooftop gardens, a public restaurant, and lounges provide shared spaces for relaxation while maintaining privacy for residents. The design balances inclusivity, luxury, and urban connectivity, creating a harmonious and welcoming space.
