

FLY ME FROM THE MOON

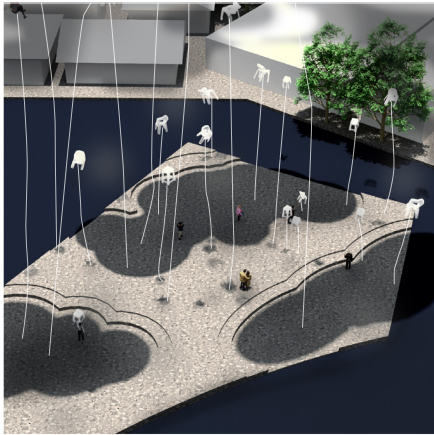

Slum Bangsue

NUNTHIPARK TANKARNJANANURAK, MICKEY

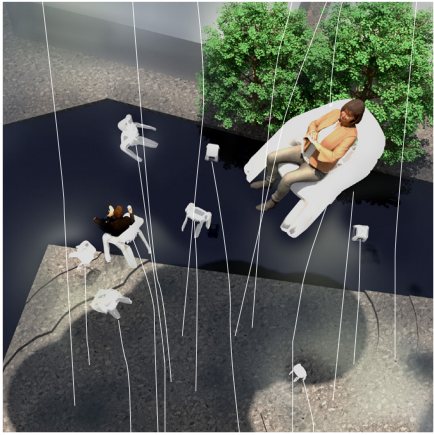

CLOUD-LIKE FOOD STALL

Using the moon's distinctively rough surface, a handy area is created for both locals and tourists to unwind and take in the surrounding and overhead views. Additionally, there is seating available due to the hills and valley of the iconic texture.

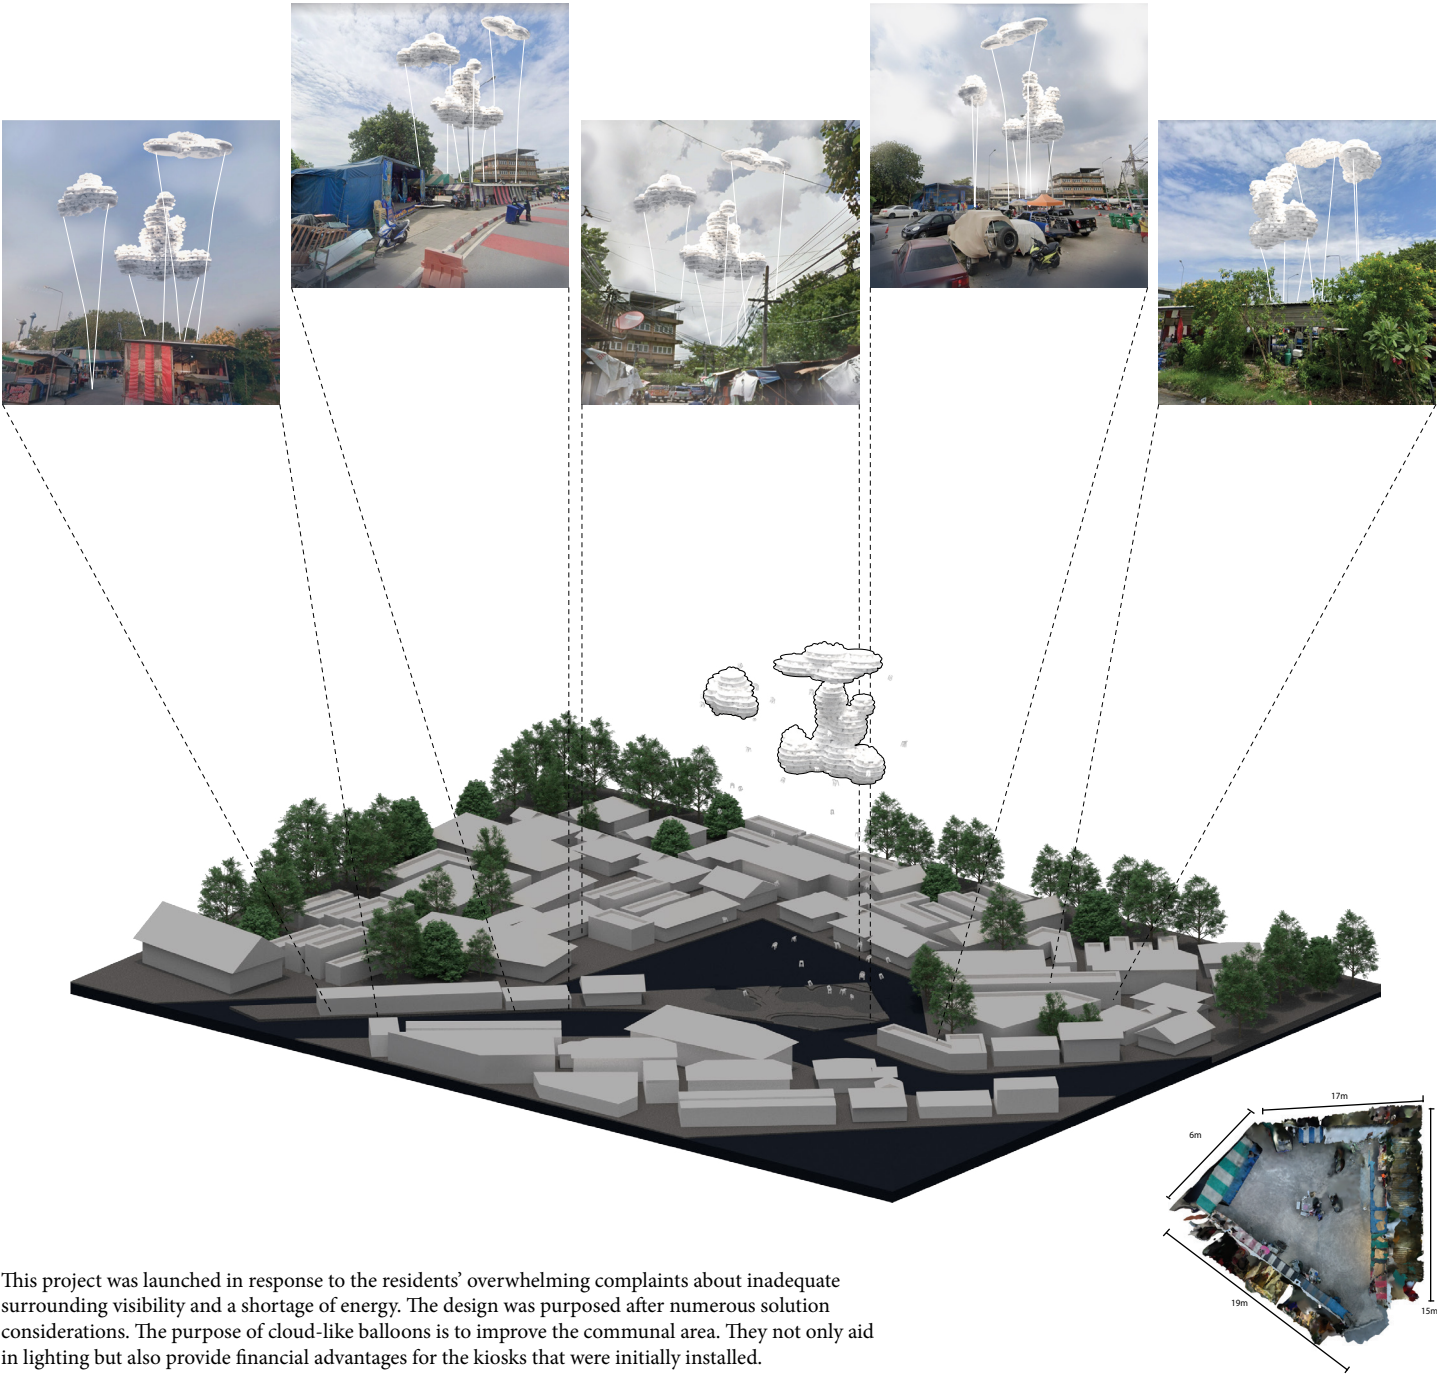

MOON-SURFACE CONVENIENT SPACE

Eating in the cloud creates an immersive experience of having a great time by using the concept of inverting the cloud with the moon. Additionally, a reflecting material that covers beneath the cloud surface aids in illuminating the slum area.

FLOATING CHAIR TRANSPORTATION

Inflated balloon chairs are the only method for getting up. Pulling the attached string and hopping on it, you are lifted up to experience the amazing things up in the clouds.

This project was launched in response to the residents' overwhelming complaints about inadequate surrounding visibility and a shortage of energy. The design was purposed after numerous solution considerations. The purpose of cloud-like balloons is to improve the communal area. They not only aid in lighting but also provide financial advantages for the kiosks that were initially installed.
